Are you an NP or PA? ASAM also provides the additional 16 hours required for NPs and PAs to qualify for a waiver.

The ASAM Treatment of Opioid Use Disorder Course covers the highest quality, evidence-based practices for treating patients with opioid use disorder.

The ASAM Treatment of Opioid Use Disorder Course is designed for:

- Physicians, nurse practitioners, physician assistants, and health care team members working with patients with opioid use disorder.
- Physicians, nurse practitioners, and physician assistants who wish to obtain a waiver to prescribe buprenorphine in office-based treatment of opioid use disorders.

Our case-based learning format will show you how to apply this new knowledge. You will learn how to:

- Have specific knowledge to offer treatments for patients with opioid use disorder.
- Identify and assess patients who are appropriate for treatment with medications.
- Discuss the psychiatric and medical co-morbidities associated with opioid addiction.
- Apply for a waiver to prescribe buprenorphine to patients with opioid use disorders.

Included with this program, individual clinician-to-clinician consultation will be available to aid you in establishing a MAT-prescribing program at your practice. In addition, a Certified Alcohol and Substance Abuse Counselor (CASAC) will be available to your staff for instruction and support on overcoming the challenges associated with a MAT prescribing program and gaining comfort in the treatment of addiction as a chronic disease.

ASAM is an approved provider by CSAT/SAMHSA of DATA 2000 training.
