

# Installing Zoom Cloud Meetings Instructions for Patients

## Apple Products:

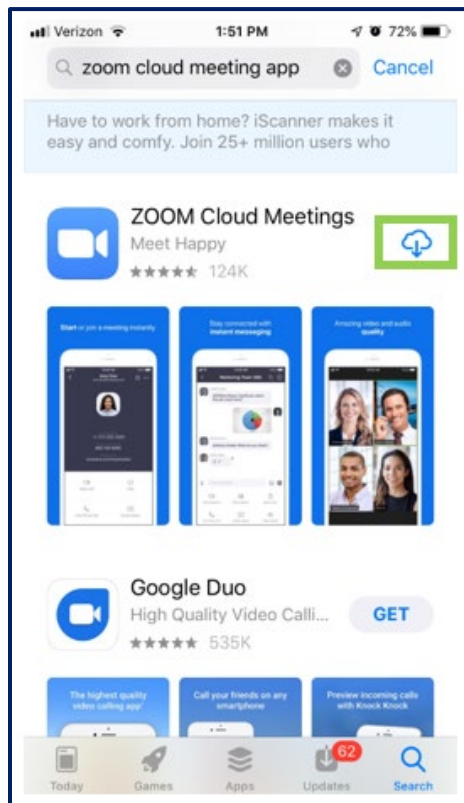

1. If needed **Unlock your iPhone** using your passcode, Touch ID, or Face ID.
2. Open the **App Store** app.

3. Search for the ZOOM Cloud Meetings app using the Search tab.

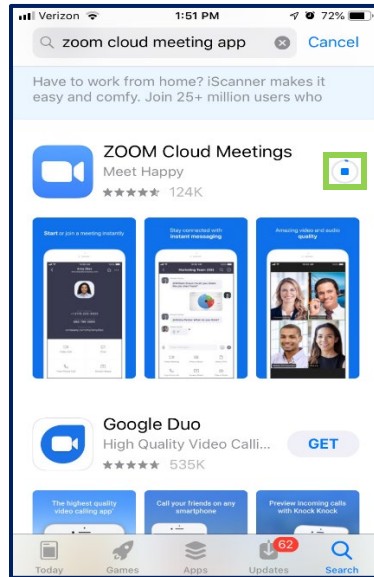

- Once you've found the ZOOM Cloud Meetings app, tap **Get** to the right of the app.

- Confirm the installation** by entering your passcode or using Touch ID if required. If you have an iPhone X, double-click the side button to activate Face ID and confirm the installation.

- Now, the app will begin installing on your iPhone. You'll see a small status circle to the right of the app in the App Store.

- Once the app has finished installing, it will show up on the Home screen of your iPhone. You may have to scroll (by swiping right to left on your iPhone's display) to your second or third Home screen to find the app. Don't worry if you can't find it. It will come up automatically when invited.
- You are now ready to use ZOOM when invited.

NOTE: The invitation to join a meeting may be sent to you via text, email, or through your patient portal. Be sure to ask the provider how they plan to send you the invite.
