September 16, 2020

Dear Colleagues:

In order to provide updates on the evolving response and best practices related to the COVID-19 pandemic, AHP will be delivering brief, critical updates on an ongoing basis addressing important highlights and frequently asked questions.

TONIGHT: Pediatric PCP Advisory Committee Meeting

AHP's Pediatric PCP Advisory Committee meets tonight at 7 pm via Zoom. Committee members received invitations and dial-in instructions earlier this week. Need assistance logging in? Contact [Renee Sutton](#).

COVID Back to School Practical Guidance Updated

Based on new information received from UR Medicine Urgent Care, the Back to School Practical Guidance document located [here](#) has been updated to reflect that asymptomatic testing for college students returning to school should be referred to state-operated testing sites or to private (non-UR) urgent care locations. Providers may also opt to perform such testing themselves, but please note that asymptomatic testing may not be covered by insurance.

For all COVID back to school information and resources, click [here](#) to view the online archive.

Next Behavioral Health Call - Tuesday, September 22nd, 12:15 to 1:00 pm

Join the AHP Behavioral Health team as well as members from our pharmacy, care management and social work teams every Tuesday from 12:15 pm – 1:00 pm via Zoom and/or phone for just in-time, virtual consultation support for the behavioral health needs of both your pediatric and adult patients. Click on the zoom link: <https://urmc.zoom.us/j/948873484> or dial in: (646) 876-9923, Meeting ID: 948 873 484.

SAVE THE DATE: PPE Pickup, Wednesday, September 23rd

Our next PPE pick-up will be held **Wednesday, September 23rd between 9:00 and 10:30 am**. Eligible practices were provided a survey link to communicate their current PPE needs, and detailed instructions for the pick-up will be provided early next week. Contact [Kevin Kelley](#) with any questions.

Next COVID-19 Response Call - Wednesday, September 23rd, 12:15 pm

Due to the relative stability in the course of the outbreak in our community and the slower influx of information related to it, AHP's COVID-19 response calls will now be held at 12:15 pm every Wednesday. **Our next COVID-19 Response teleconference will be held at 12:15 pm, Wednesday, September 23rd.** Click on the Zoom link <https://urmc.zoom.us/j/98969184459> or dial in to (669) 900 6833, Meeting ID: 989 6918 4459

COVID Testing

Clinical Guidance - Serologic Testing

Primary care providers may consider ordering IgG antibody testing for:

- Individuals who have fully recovered from COVID-19 who are interested in donating convalescent plasma
- Pediatric patients with suspected or confirmed Multi-System Inflammatory Syndrome in Children (MIS-C)
- Patients who had illness suggestive of COVID but who were unable to receive PCR testing

Referring patients to UR Labs collection site for phlebotomy may be difficult due to volume of patients able to be accommodated, so community providers are advised to draw in the office and send the tube (SST or standard red top tube) to the lab. For more information about the methodology and performance of UR Labs' testing assay, click [here](#).

Reimbursement Guidance - Serologic Testing

The only patient cohort for whom health insurance will reliably cover serologic testing are those patients who had symptoms consistent with COVID infection but who were unable to receive PCR testing, and thus antibody testing is being used to confirm prior COVID exposure. Provider claims for medically appropriate COVID-19 testing MUST be submitted with one of the following codes: CPT® codes U0001, U0002, U0003, U0004, 0202U, 86328, 87635, and/or 86769. These codes may be billed with diagnoses of B97.29, U07.1, Z03.818, and/or Z20.828 when appropriate.

Clinical Guidance: PCR Testing

In addition to testing for symptomatic healthcare and other essential workers and long term care residents, primary care providers may consider testing for the following patients:

- Mild to moderately symptomatic patients
- Patients whose living arrangements are not amenable to isolation (e.g., multi-generational household, limitations of physical space, etc.)
- Patients whose employers require evidence of testing either to return to work or to access benefits related to COVID status
- Patients who will be undergoing an aerosolizing procedure (e.g., exercise stress test, endoscopy procedure, transesophageal echocardiography [TEE])
- Pediatric patients with symptoms suggestive of Multi-System Inflammatory Syndrome in Children (MIS-C)
- Children with complex health needs whose specialized childcare providers (e.g., Daystar) require testing prior to returning

There is increasing variability in how rapidly results of PCR tests are being returned based upon where the study is resulted. UR Labs are currently resulting all studies internally with results expected within 48 hours and often much quicker. We will continue to update on testing availability and processing time as information changes.

We continue to partner with Dr. Mendoza and County Health Department officials on preparedness and response protocols and will convey information as it becomes available.

Thank you for your continued collaboration in this important public health endeavor.

All the best,
