

AHP Pediatric PCP Advisory Group Meeting Overview

Dear :

Thank you for participating in the AHP Pediatric PCP Advisory Group meeting on Wednesday, December 2nd. For those unable to attend, the full recording of the meeting can be viewed [here](#), and a copy of the PowerPoint slides may be downloaded [here](#).

Other important items for follow-up:

Return to Play

On December 4th, the American Academy of Pediatrics released additional guidance on Return to Play related to COVID-19 infection and included additional masking recommendations during sports activities. The full article can be found [here](#).

Based on this updated guidance, the Golisano Children's Hospital COVID Pediatric Return to Play Workgroup has revised its guidance algorithm for pediatric patients K-12, found [here](#). Providers may access a Pediatric Assessment/Release for Return To Play template from the Finger Lakes Schools Reopening Task Force [here](#).

Community Collaborative Behavioral Health Meetings

Starting in 2021, a number of community collaborative conversations will be conducted with area school districts and the providers that serve their student populations. **The first meeting will center around behavioral health and the Greece School District**, and we anticipate that it will be held in January. Once the final date has been established, invitations will be issued to providers who care for this district's children and youth.

Universal Newborn Telehome Visitation

Many of you indicated interest in the universal newborn telehome visitation model, details about which can be found in the meeting slides located [here](#). We will provide you with further updates in late December and double check on your practice's interest in participating.

As always, please reach out with any questions or concerns to [LJ Shipley, MD](#) or [Renée Sutton](#).

Thank you!
LJ and the AHP team
