Dear Colleagues:

In order to provide updates on the evolving response and best practices related to the COVID-19 pandemic, AHP will be delivering brief, critical updates on an ongoing basis addressing important highlights and frequently asked questions.

### COVID Vaccination for Healthcare Workers

Due to vaccine allocation shortages, we do not anticipate URMC clinic openings for community health care workers this week. As soon as we have any information about new clinics that will accommodate eligible private practice healthcare workers, we will share it.

### New Online Resources

[Pediatric Return to Exercise After COVID FAQs](#): Additional guidance for primary care providers considering EKG and/or referral to pediatric cardiology post-COVID infection, as based on the previously revised [algorithm](#) and [assessment/release templates](#)

### COVID Vaccination and Pregnant/Lactating Patients

Patients considering vaccination who are pregnant, plan to become pregnant, or are breastfeeding are strongly encouraged to discuss their options with their healthcare providers. Patients and providers with questions about COVID vaccines in pregnancy and lactation, are invited to call 585-275-3638 or email

[MothersToBaby@urmc.rochester.edu](mailto:MothersToBaby@urmc.rochester.edu) with their questions.
