

# WHAT IS VASCULAR AND INTERVENTIONAL RADIOLOGY?

The Interventional Radiology Team at UR Medicine is highly qualified to provide the most advanced level of care available for your patient's specific need.

IR involves a minimally invasive, targeted diagnosis and treatment of diseases, non-surgically. Often, these procedures offer less risk, less pain and less recovery time when compared to open surgery.

## Common Procedures Include:

- Abdominal/Chest Vascular Disease Management (Visceral Arterial and Venous Stenotic Occlusive Disease)\*
- Dialysis Maintenance (including Hemodialysis Catheter Placement and AV Fistula Maintenance)
- Gastrointestinal and Parenteral Feeding Interventions
- Genitourinary Interventions
- Hepato-Biliary Interventions
- Interventional Oncology (including Tumor Ablation, and Intra-Arterial Therapies)
- Vascular Access
- Management of Vascular Aneurysms (ie. Abdominal Aortic Aneurysm)\*
- Pain Management
- Peripheral Vascular Disease Management (including PAD, Venous Insufficiency and Varicose Vein Management)\*
- Routine Biopsies and Drainage
- Spinal Interventions (including Kyphoplasty)
- Venous Thromboembolism (VTE) Management (including endovascular management of DVTs and PEs)\*
- Women's Health Issues (Uterine Fibroid Embolization, Pelvic Congestion)

\*In collaboration with URM Department of Vascular Surgery

## Providers at all Affiliate Hospital Locations:

**Sanjiv Virdee, MD**, *Regional IR Director*

**Sarena Virdee, MD**

**Bhupinder Hoonjan, MD**

**Audra Rhinehardt, PA-C, RT**

## Providers at F.F. Thompson Hospital:

**David E. Lee, MD**

**David Waldman, MD, PhD**

**Kathleen Woodhams, MS, NP**

**Ann Marie Tomandl, RPA, RT**
